

## Steps to Apply Iron-on Inventory Tags

- 1) Cut a few tags off the roll. Look for the tiny bars at the top of the tag and cut.

- 2) Preheat the Petite Press to setting 4 (350°). Wait until the red light stops flashing.

- 3) Position the uniform over the Mini Ironing Board where you plan to apply the tag.

- 4) Place the tag on the uniform. Place the Petite Press on the tag and hold firmly for 6-10 seconds. The iron will not cover the entire 1.5" x 1" tag in one pressing. Move the iron to a new location and press again.

- 5) Check that the tag is adhered. If there are corners that are not fully adhered, press again for 6 - 10 seconds.

\* Note: If a tag comes off after washing - you may apply it again - or request a free replacement tag from Uniform Inventory Resources.

*Costume & Uniform Inventory Resources is **not** responsible for loss of tags or damage caused by applying tags.*

We provide free samples and encourage customers to test the tags before applying to uniforms.
